SUMMARY

Motivated CS student (GPA 3.91, President's List) with hands-on experience in Python, C++, embedded systems, and full-stack web development. Hackathon winner, IEEE competitor, and active open-source contributor. Seeking a software engineering internship where I can contribute immediately while continuing to grow.

EDUCATION

University of Texas Rio Grande Valley (UTRGV)

B.S. in Computer Science · Brownsville, TX · Expected Dec 2028 · GPA 3.91 — President's List (Fall 2024)

Preparatoria Ricardo Flores Magón

High School Diploma · Matamoros, Tamaulipas · Graduated July 2024

TECHNICAL SKILLS

Languages	Python, C++, PHP, HTML/CSS, SQL
Frameworks & Tools	React, Laravel, Framer Motion, Git, GitHub, PythonAnywhere, Vercel
Hardware	ESP32, Arduino, GPIO, Motor Control, Lego Mindstorms EV3
Languages (Spoken)	Spanish (Native), English (Professional)

PROJECTS

AuraFit — AI Fitness App | github.com/Felglitch739

FronteraHacks Hackathon · 2025

- Won FronteraHacks 24-hour hackathon; built an AI-powered fitness tracker with body analysis, personalized workout plans, and real-time progress monitoring.
- Designed mobile-first UI with React; integrated AI/ML model for body metrics analysis.

Gazpachos Landing Page | gazpachos-lp.vercel.app

Full-Stack Web App · Live on Vercel · 2024–2025

- Developed a production glassmorphism SPA for a restaurant client featuring interactive menu, online ordering, and social media integration.
- Built with React, Framer Motion, and deployed to Vercel; used as the base template for Build Pa'l Norte Hackathon workshops.

FamilyWeather Bot | github.com/Felglitch739/Family_Weather

Python / Telegram API · PythonAnywhere · 2024

- Built and deployed an automated Python bot that fetches real-time meteorological data and sends daily formatted weather reports to family members on schedule.

Autonomous Robot — IEEE R5 Mining Mayhem

IEEE Robotics Competition · 2026

- Integrated hardware and software using ESP32 microcontrollers with GPIO pins and motor control logic for a competitive robotics challenge.

EXPERIENCE & ACHIEVEMENTS

Build Pa'l Norte Hackathon

Organizing Committee & Workshop Presenter

2025–2026

IEEEExtreme 18.0 & 19.0	Global 24-hr Programming Competition — IEEE	2024, 2025
1st Place Regional Robotics	5th Place National — Punto Mexico Conectado, Matamoros	2018
Sombrero Fest — IEEE UTRGV	Volunteer, access control and event logistics	2025

CERTIFICATIONS

Responsive Web Design	freeCodeCamp	2023
Arduino Fundamentals	Asociacion de Robotica Aplicada (ARACT)	2021
